

Global remittance on WhatsApp

*POWERED BY VERILEUM*

It's 2022, and sending money abroad still sucks for Africans

## Without Wano

- Africans are forced to send money abroad using traditional banks and fintechs that **take 10% - 15% in hidden exchange fees**
- Poor Africans in rural communities can't receive money from their loved ones because **they don't have bank accounts or crypto wallets due to restrictions and high frictions**

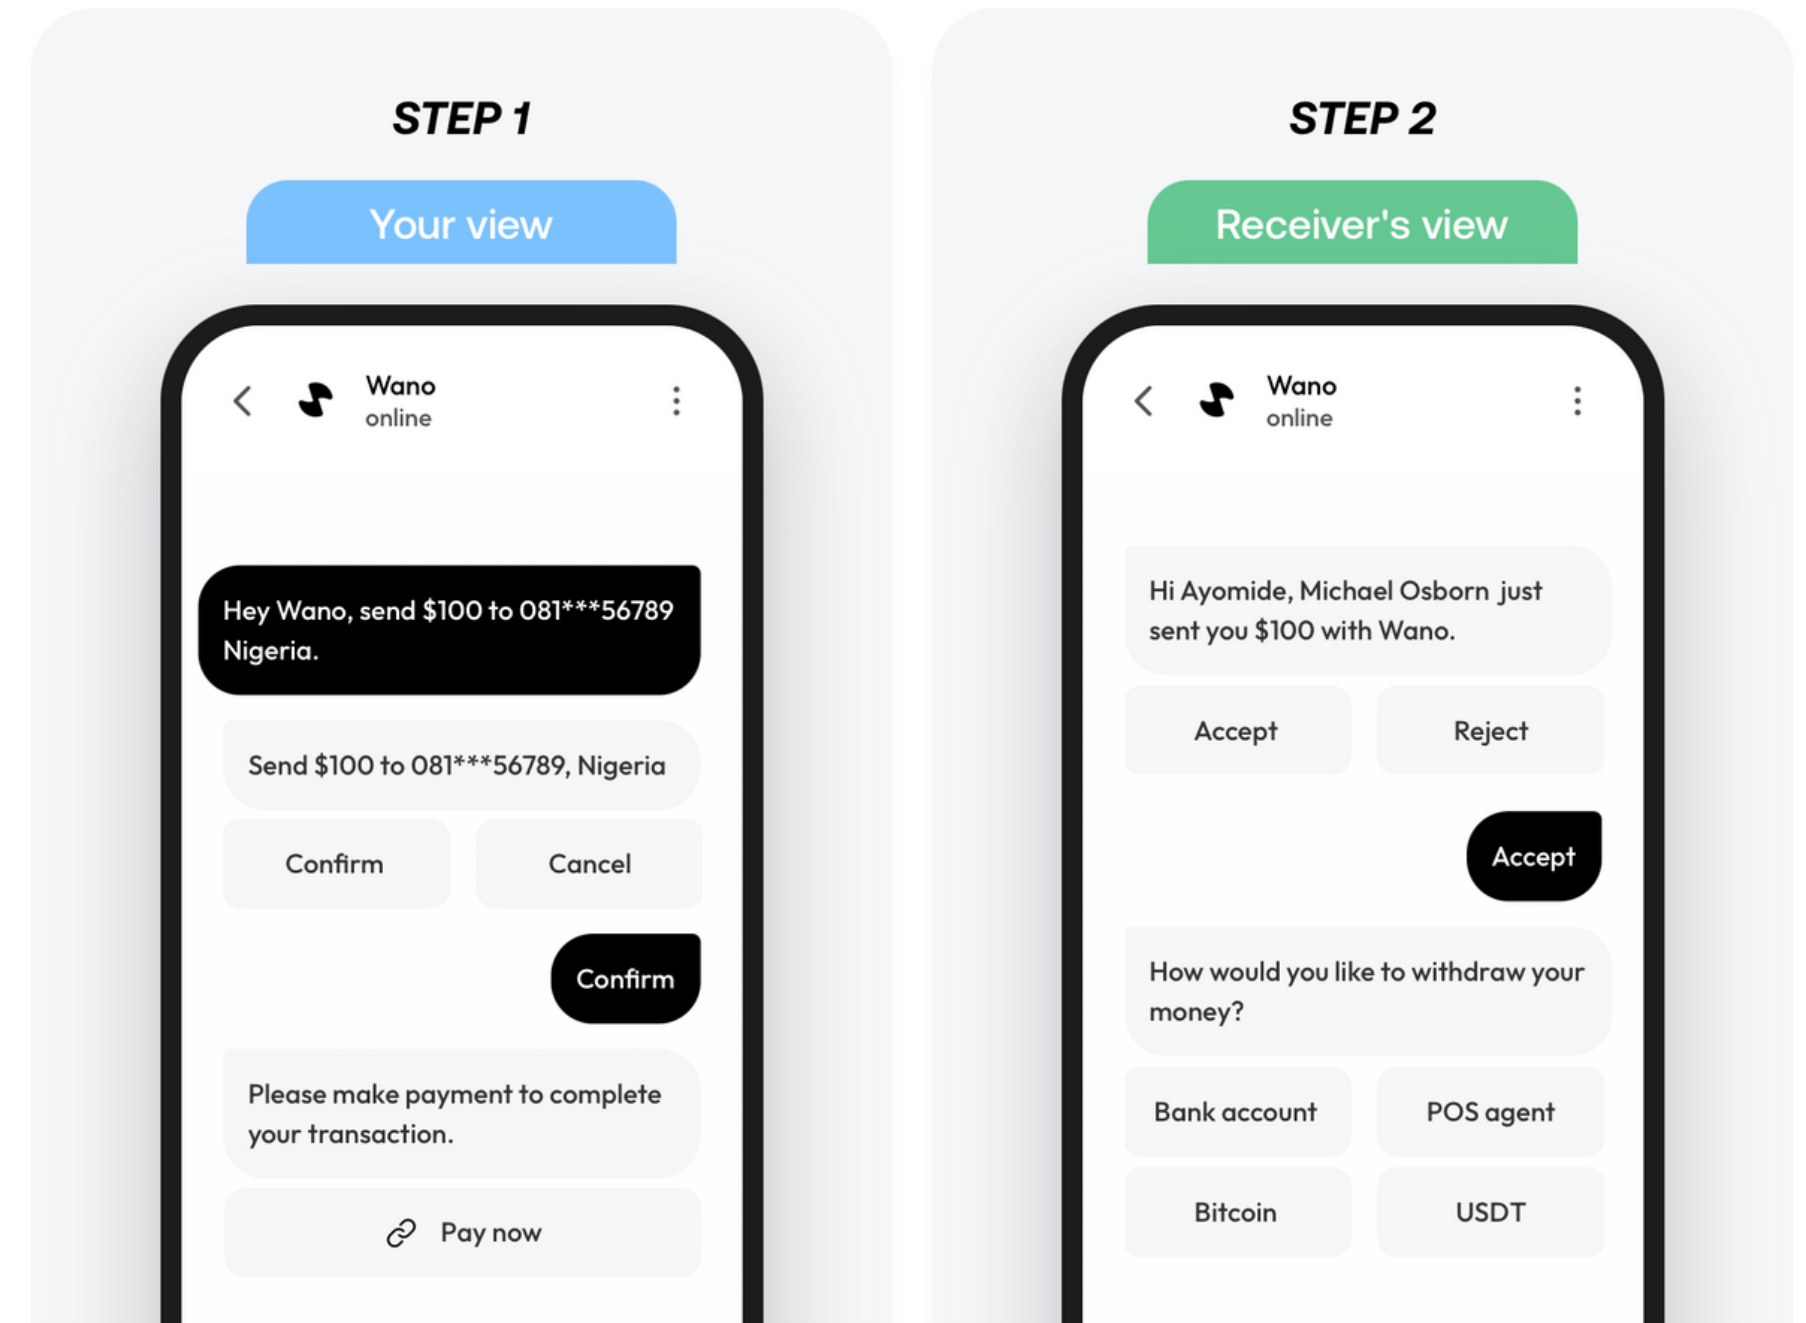

## With Wano

- Africans can now send money to any WhatsApp number in the world in seconds for **just 1% fee, using stable-coin technology**
- Poor Africans in rural communities can receive money from their loved ones abroad on WhatsApp, and withdraw through any mobile money agent or directly to their bank account.

Wano has built a simple global stable-coin wallet on WhatsApp for every African on the continent to instantly send money to any WhatsApp number in the world.

For the first time, Africans can send money abroad to their loved ones on WhatsApp without worrying about local or foreign bank limitations.

We have removed all the frictions out the current horrible UX with stable-coin p2p payments and made it better than popular consumer solutions like Quidax and Patricia, so that even the most uneducated and unbanked Africans can receive money on Whatsapp and withdraw to their local bank account or through any mobile money agent in Africa.

*Still in doubt, try it yourself:*

## Our mission

Wano is on a mission to enable Africans move money anywhere on the internet. Moving money for Africans should be as easy as sending a message, and we will be the best in the world at this.
